

JLCC, Inc. Announces Invitation to Present at the American Flame Research Counsel 2014 Industrial Combustion Symposium

May 22, 2014

DALLAS - JLCC, Incorporated (Jerry Lang Combustion Consulting), a long-time leader in combustion and emission technology for petrochemical and chemical, oil and gas production, industrial, commercial, and other markets, announced today that Global Combustion Consultant Jerry Lang, Founder of JLCC has been invited to present a technical paper at the American Flame Research Committee's 2014 Industrial Combustion Symposium, Tuesday, September 09 at 4:30 p.m. at the Hyatt Regency Hotel, Houston Texas.

Brad Smith of JLCC said they are looking forward to Jerry sharing his 60 Years of Fuel Dilution Technology and experience and his accomplishments achieved over the last 60 years in combustion and emissions.

The American Flame Research Committee (AFRC) is composed of representatives of industrial and research organizations and associated eminent combustion expert members in the United States, Canada and Mexico. The AFRC sponsors open forums in North America on applied combustion technology and research and supports the applied combustion research activities of the International Flame Research Foundation (IFRF). The IFRF is a worldwide network of industrial companies and academic institutes working to achieve cleaner and more efficient industrial combustion. The main task of the Foundation is thus the acquisition and generation of information with which to design flames for the efficient heating of industrial processes, with minimal environmental effects, and thereafter the design of combustion equipment to produce such flames.

The Industrial Combustion Symposium is attended by major engineering and construction firms, OEMs, universities, state and federal regulators, governmental and non-governmental research organizations, research organizations, public interest groups and others with an interest in the design, operation, supply and regulation of combustion equipment.

About JLCC

JLCC is a Combustion & Emission Consulting Firm located just East of Dallas Texas, specializing in developing combustion and low emission technology and developing equipment that is generally not otherwise available. JLCC solutions are proposed that are tailored to specific conditions. Jerry Lang, Founder of JLCC, is recognized among colleagues as one of the top combustion consultants in the world.
